SUMMARY

Technical professional with 8+ years across support, quality analysis, operations and data, now building internal business systems. Designed and shipped a Dataverse-backed exceptions database with a JavaScript search front end that replaced an unstructured Excel workbook and is now used daily by an operations team. Hands-on with SQL and PostgreSQL data modeling, REST APIs and webhooks, workflow automation, and Python, JavaScript and Node.js. Strong at turning messy operational processes into structured, maintainable systems, and at root-cause troubleshooting of production integration failures. Programming diploma plus a business administration degree, which helps in translating business needs into software.

TECHNICAL SKILLS

Backend and databases: SQL, PostgreSQL (Supabase), Dataverse, schema design, star-schema modeling, ETL, data cleaning and consolidation (Power Query / M)

Application development: JavaScript, Node.js, Express, Python, R and Shiny, HTML/CSS, REST APIs, webhooks

Automation and integration: n8n, Power Automate, SharePoint, Stripe, PayPal, Zendesk and 8x8 integrations, Mailchimp

Analytics and reporting: Power BI, Excel, Python, structured reporting, dashboards

Working style: Root-cause analysis, technical documentation, escalation reports, independent remote self-management, cross-team coordination

EXPERIENCE

Cambridge University Press & Assessment Hybrid, Philippines

Data Analyst *Oct 2026 – Present*

- Cataloging and organizing data across systems into clear, business-ready packages so teams know exactly what data exists, what it means, and how to use it.
- Setting and monitoring quality standards—ensuring our shared data is complete, accurate, and updated on time so leadership can make decisions with confidence.
- Acting as the bridge between business teams and technical architects, translating business requirements into clear data specifications and rules.
- Providing essential data and reporting support for high-priority enterprise initiatives, such as sustainability tracking and cross-department collaboration.
- Creating simple visual reports and dashboards that help leaders track progress, spot trends, and measure performance without needing technical tools.

School Approval Officer *Mar 2025 – Sep 2026*

- Designed and built an internal exceptions database to replace an unstructured Excel workbook: a Power Query (M) pipeline cleans and merges six sheets into a single schema stored in Dataverse, with a JavaScript search interface on top. Adopted by the team for daily use.
- Translated day-to-day operational pain points into a structured data model and a working internal tool, working directly with the people who use it.
- Reviewed and processed school affiliation applications and prepared reports; coordinated with internal teams to keep applications moving.

Art Storefronts Remote (US-based company)

Technical Support Representative *May 2024 – Dec 2024*

- Primary technical contact for an e-commerce platform serving artists; diagnosed integration failures across payment gateways (Stripe, PayPal, Payoneer), domain providers (GoDaddy, WordPress, Wix) and email tools (Mailchimp).
- Investigated broken API connections and webhook misconfigurations, identified root causes and wrote clear escalation reports for engineering.

- Fixed and customized customer sites using HTML, CSS, JavaScript and the database; set up Meta Business and Google Analytics integrations.
- Configured and tested ad automation and automated replies for Instagram and Facebook; supported discount code setup and advised on shipping, taxes and marketing.
- Worked in a US-based team, remotely and independently.

TaskUs (client: Instagram) Remote, Philippines
Quality Analyst, Content Moderation *Sep 2020 – May 2024*

- Audited moderation decisions for policy accuracy; analyzed performance data to find process gaps and reported findings to stakeholders.
- Contributed to improvements in training materials.
- Built strong habits in structured reporting, documentation and data analysis at scale over nearly four years.

Teleperformance (client: AT&T Mobile) On-site, Philippines
Technical and Customer Support Representative *Jun 2019 – Sep 2020*

- Resolved inbound technical and account issues in a high-volume environment requiring documentation discipline and careful handling of customer data.

Concentrix (clients: Apple, TripAdvisor) On-site, Philippines
Support Representative *Jun 2018 – Jun 2019*

1-800-Flowers Apr 2018 – May 2018
Customer Support (seasonal)

PORTFOLIO PROJECTS

Harborlight Data Architecture (Data Architecture, PostgreSQL, SQL, ETL)

Designed a data architecture project documenting data modeling, database structure and data pipeline workflows, with an emphasis on scalable, maintainable and reliable data systems.

github.com/jaymagayanes/harborlight-data-architecture

Exceptions Database Web App (Power Query, Dataverse, JavaScript)
Internal business tool replacing a multi-sheet Excel workbook: consolidated schema, automated cleaning pipeline and search UI. Used in production by the team; the public repo contains a sample-data version.
github.com/jaymagayanes/exceptionsDatabase_SearchPortal

NYC 311 Support Operations Analytics (Python, PostgreSQL, Excel, Power BI)
Analyzed 884,765 service requests; built a star-schema SQL model, Excel dashboard and Power BI report.
github.com/jaymagayanes/nyc-311-analytics

Global Education Intelligence Dashboard (Python, PostgreSQL on Supabase, R Shiny)
ETL pipeline for World Bank data across 261 countries (2000–2023), a custom index, trend regression and a live dashboard.
github.com/jaymagayanes/global-education-intelligence

Support Ticket Routing Prototype (Node.js, Express)
Rule-based ticket classification, SLA logic, suggested replies and a simulated CRM sync.
github.com/jaymagayanes/ai_support

Zendesk Report Automation (Python, REST API)
Pulls ticket data via API and generates CSV and HTML summary reports.
github.com/jaymagayanes/Zendesk-Report-Automation

EDUCATION

BS in Business Administration, University of Rizal System, Philippines 2015 – 2019
Diploma in Computer Programming, ICCT Colleges, Philippines 2012 – 2014
