SUMMARY

Customer and technical support professional with 8+ years of experience across customer support, technical support, quality analysis, operations and data. Nearly four years as a quality analyst on Instagram content moderation, plus hands-on technical support for an ecommerce platform, including API integrations and root-cause troubleshooting. Working knowledge of Python, SQL, JavaScript, R and the Microsoft Power Platform, with several small projects published on GitHub.

SKILLS

Data and analytics: Excel, Power Query (M code), SQL and PostgreSQL, Python, R and Shiny, Power BI

Web and automation: JavaScript, HTML and CSS, Node.js and Express, REST APIs, webhooks, n8n, Power Automate, SharePoint, Dataverse

Support platforms: Zendesk, Salesforce, Intercom, 8x8, Stripe, PayPal, Mailchimp, WordPress

Strengths: Root-cause analysis, quality auditing, structured reporting, documentation, escalation handling, remote self-management

EXPERIENCE

Education organization (name available on request)

Hybrid, Philippines

Data Analyst (onboarding) | Oct 2026 - Present

- Moved into a data analyst role within the same organization and am currently onboarding, learning the team's data processes and tools.

School Approval Officer | Mar 2025 - Sep 2026

- Reviewed and processed school affiliation applications and prepared reports.
- Coordinated with internal teams to keep applications moving.
- Built an exceptions database web app to replace an unstructured Excel workbook: a Power Query (M code) pipeline cleans six sheets into one schema stored in Dataverse, with a JavaScript search page on top. Now used by the team.

TaskUs (client: Instagram)

Remote, Philippines

Quality Analyst, Content Moderation | Sep 2020 - May 2024

- Audited content moderation decisions for policy accuracy.
- Analyzed performance data to find process gaps and reported what I found.
- Contributed to improvements in training materials.
- Built strong habits in structured reporting and data analysis at scale over nearly four years.

Art Storefronts

Remote (US-based company)

Technical Support Representative | May 2024 - Dec 2024

- Primary technical contact for an ecommerce platform where artists sell original art and prints online.
- Diagnosed integration failures across payment gateways (Stripe, PayPal, Payoneer), domain providers (GoDaddy, WordPress, Wix) and email tools (Mailchimp).

- Investigated broken API connections and webhook misconfigurations, found root causes and wrote clear escalation reports.
- Helped artists build and fix their websites using HTML, CSS, JavaScript and the database, and set up integrations with Meta Business and Google Analytics.
- Configured and tested social media ad automation for Instagram and Facebook, built automated replies, supported discount code set-up, and advised on shipping, taxes and marketing.

Teleperformance (client: AT&T Mobile)
On-site, Philippines

Technical and Customer Support Representative | Jun 2019 - Sep 2020
- Handled inbound calls about mobile service, including phone eligibility, loan amount corrections, text and call subscriptions, and website access.
- Worked in a high-volume setting that required documentation discipline and care with customer data.

Concentrix (clients: Apple, TripAdvisor)
On-site, Philippines

Support Representative | Jun 2018 - Jun 2019
- Answered incoming calls, chats and emails for two consumer brands.

1-800-Flowers

Customer Support (seasonal) | Apr 2018 - May 2018
- Seasonal customer support for a flower delivery company.

SELECTED PROJECTS

NYC 311 Support Operations Analytics (Python, PostgreSQL, Excel, Power BI)
Analyzed 884,765 public service requests. Built a star-schema SQL model, an Excel dashboard and a Power BI report. github.com/jaymagayanes/nyc-311-analytics

Global Education Intelligence Dashboard (Python, PostgreSQL on Supabase, R Shiny)
ETL of World Bank data for 261 countries (2000-2023), a custom index, trend regression and a live dashboard. github.com/jaymagayanes/global-education-intelligence

Exceptions Database Web App, sample-data version (Power Query, Dataverse, JavaScript)
Search tool that replaces a multi-sheet Excel workbook.
github.com/jaymagayanes/exceptionsDatabase_SearchPortal

Zendesk Report Automation (Python, REST API)
Pulls ticket data and writes a CSV report and an HTML summary.
github.com/jaymagayanes/Zendesk-Report-Automation

Support Ticket Routing Prototype (Node.js, Express)
Rule-based ticket classification, SLAs, suggested replies and a simulated CRM sync.
github.com/jaymagayanes/ai_support

EDUCATION

BS in Business Administration, University of Rizal System, Philippines | 2015 - 2019
Diploma in Computer Programming, ICCT Colleges, Philippines | 2012 - 2014
